

## **WHAT DO WE KNOW ABOUT SUSTAINABILITY?**

- 1- Students are divided into pairs. They receive an image showing a sustainable or unsustainable action. They write down as many words as possible about the image.
- 2- After 6-8 minutes, two pairs of students sit together and compare their two images (they show the same action, but in one image it is sustainable and in the other one it is unsustainable). 10 minutes of discussion.
- 3- Each group of students present their images in front of the rest of the class.
